

WÄRTSILÄ VIRTUAL TRAINING SOLUTION

The Wärtsilä Virtual training solution combines the quality and efficacy of classroom training with the flexibility of remote learning to provide a world-class learning experience for our energy and marine customers in a safe and cost-effective way.

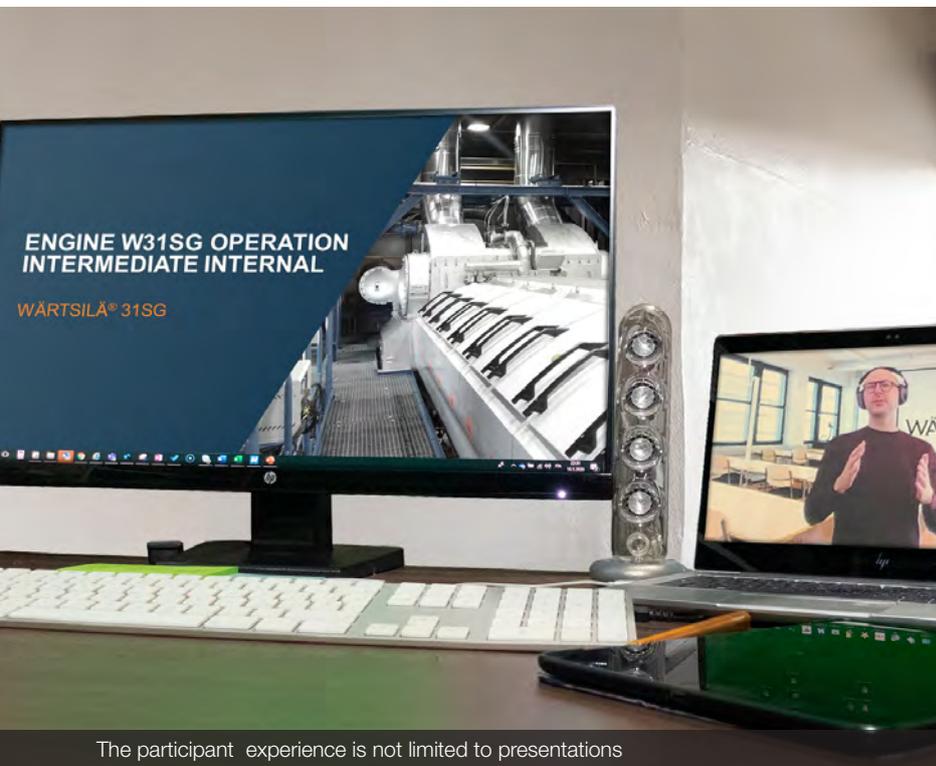

A fully interactive experience

Unlike most online training courses, which are typically one-way experiences, Wärtsilä Virtual training courses are fully interactive with participants benefiting from expert guidance and suggestions from our experienced trainers in real time. In practice most of the theoretical lessons and a selection of simulation sessions can be delivered virtually. If the training plan requires hands-on

practical lessons to enable participants to achieve the required competence level, these will be delivered at a Wärtsilä Land & Sea Academy (WLSA) training centre during a dedicated session.

Key benefits

- Efficient, flexible and cost effective – save up to 30% on training costs as travelling is not needed
- Classroom-quality training without the need to travel
- Fully customisable course content

The participant experience is not limited to presentations

Use of real components and equipment

Online simulator sharing

Participation made easy

Our virtual training platform can be connected to any video conferencing system; alternatively, participants can join individually from their own computer or tablet. For the best experience, we recommend a minimum screen size of 24” and a headset. A 30-minute ‘soundcheck’ session will be arranged one week prior to the start of the course to check that everything is working as it should.

Engaging training methods

The WLSA focuses strongly on pedagogical implications and our instructors are specially trained in virtual delivery. The goal is to ensure participants are engaged for the entire duration of the session through the smart use of time and by using polls, exercises, animations, and discussion sessions to support the main presentation.

Why choose Wärtsilä?

The WLSA has over 30 years’ experience in developing and providing customer training. Our training solutions are created and developed by a dedicated team of professionals and are ideal for energy and marine customers who could benefit from virtual training as part of their wider training and competence development programme.

BOOK YOUR COURSE
